

The Biggest *Blunders* Most Men Make About Prostate Health ...that can leave you with

- ✓ Urination troubles
- ✓ Waking up all hours at night to "go"
- ✓ "Performance" anxiety in bed

"Most men I treat for the first time are making big mistakes when it comes to their prostate health. For example...

BLUNDER No. 1: Ignoring the symptoms and doing nothing.

"This should never be, because urination troubles, prostate concerns, sleeping difficulties and even "performance" anxiety are not normal. You can ease these concerns—safely and naturally.

BLUNDER No. 2: Hoping these worries will just go away

"Nine out of ten men *will* have prostate concerns, and many of these issues get

worse with age. Some men do nothing until a real emergency strikes.

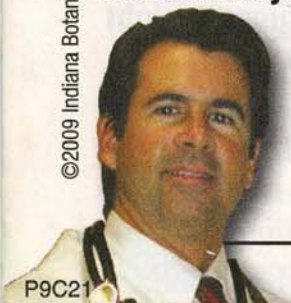

BLUNDER No. 3: Relying on weak, watered-down prostate supplements

"Most of these supplements are missing key nutrients, are based on old research or have dosages that don't meet clinical study amounts—so they likely won't work for you.

"BUT INSIDE, you'll discover a super potent natural prostate remedy that banishes urination troubles and prostate worries for good and works dramatically even when others fail! It's the only one I trust..." (Page 3)

BY DR. GARY GENDRON

Dear Friend,

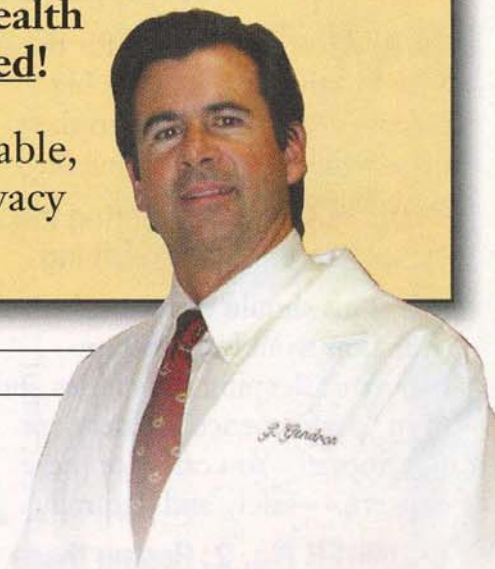

Imagine for a moment
that you could *avoid* the
prostate concerns that most
men I treat suffer from.

Concerns such as...

- **Difficulty urinating**—
starting then stopping,
dribbling or a weak stream
- **Always having to “go”**—
never feeling like your
bladder is empty

- **Getting up 3-4 times a night
to relieve yourself**—
and always feeling tired
- **Worrying about your
“performance” in bed**—
and intimate relationships

Now imagine you could boost
and protect your prostate *nine ways*

at once and keep your prostate healthy for life.

To top it off, imagine if you could urinate better, sleep better and make love better.

Sound good? All of these benefits are yours *if you avoid* the biggest blunders most men make in treating prostate concerns. Let me start with some surprising news.

To banish urination troubles and prostate concerns...

You need to bring out the "big guns!"

Since 1985, I've been treating men and their health problems. But never before have I seen *more* men with urination troubles and prostate issues than now. It's an epidemic!

In fact, roughly **nine out of every 10** men over the age of 40 whom I treat suffer from prostate concerns. And in the worse cases, it's a real nightmare for some.

They have to urinate all the time, but when they try to, they can't get their stream going. And when they do go, it's a weak, dribbling flow.

Worse, they tell me they have to get up at night multiple times to urinate—so they're always tired during the day. And to add insult to injury, some tell me these problems are affecting their lovemaking, too!

Sadly, this epidemic is nationwide. Millions of men are suffering!

But even more, most men make the big blunder of trying to relieve these symptoms and boost their prostate health with weak, watered-down prostate supplements.

In fact, I recently went to a local

Read this special issue if you...

- ✓ Feel like you always have to "go"
- ✓ Have the sensation of not emptying your bladder after urinating
- ✓ Stop and start several times when you urinate
- ✓ Can't hold your urine
- ✓ Have a weakened urinary stream
- ✓ Wake up at night to relieve yourself
- ✓ Push or strain when you urinate
- ✓ Worry about prostate issues
- ✓ Suffer from "performance" anxiety in bed
- ✓ Want only the best prostate protection that modern science offers

health food store and looked at more than a dozen prostate supplements. Shockingly, nearly *80 percent* of them had dosages of nutrients that were too small....were missing key nutrients...or didn't have the right combination of nutrients for maximum prostate health.

Taking these weak, ordinary prostate supplements is like trying to use a BB gun to stop an elephant.

This is a TRAVESTY that should never happen!

Research now shows you need:

(continued next page...)

- **STRONG** dosages...
- **STRONG** nutrients...and
- A **STRONG** combination of nutrients to banish urination troubles, sleep disruptions waking up to "go", and "performance" anxiety in bed—and to boost your prostate health.

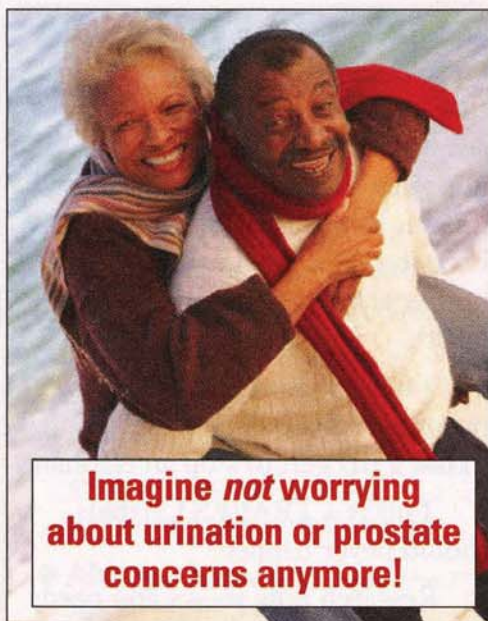

For ultimate prostate health, you need to bring out the **BIG GUNS!**

And that's why I'm excited to tell you about...

A super potent natural prostate formula that works dramatically when others fail

Over the years, I've had great success helping my patients (and myself) improve prostate health, plus banish urination issues with selected nutrients. Those were good solutions at the time, but now there's something better.

I've worked with a team of top-flight scientists and nutritionists to combine the very best of these

nutrients into a breakthrough natural prostate formula that's the only one I trust to keep my prostate healthy for life.

It's called *Prostate 9 Complex*[™] and, quite frankly, it leaves all other prostate supplements in the dust.

It's the most powerful and potent prostate formula you could possibly take—period!

Even better...

...it's been proven to work by the toughest critics of all

Bottom line: *Prostate 9 Complex*[™] works like gangbusters, and here's the proof:

✓ **Clinical proof:** As you're about to see, its nutrients, dosages and combinations of nutrients are **proven effective in numerous medical and clinical studies** in America and all over the world.

✓ **Scientific proof:** Its advanced formula is based on the latest cutting-edge scientific research and includes **high** dosages, **key** nutrients and **unique combinations** of prostate-boosting nutrients found nowhere else.

✓ **Patient proof:** More than **125,000 men** have taken the original *Prostate 9 Complex*[™] formula and swear by it. They write glowing comments such as: "It's a godsend"... "It's changed my life"...and "I immediately noticed improved results." And now, it can do wonders for you, too!

Using this proof, you're about to

see why *Prostate 9 Complex™* is the *only* prostate supplement that...

- Eases, relieves and can even help end your urination troubles—starting right away!
- Lets you sleep uninterrupted all night long—so you feel rested again!
- Restores your confidence and self assurance—no more “performance” anxiety in bed!
- Boosts and protects your prostate health nine natural ways at once—*guaranteed!*
- Keeps your prostate healthy—now and for the rest of your life—safely and naturally!

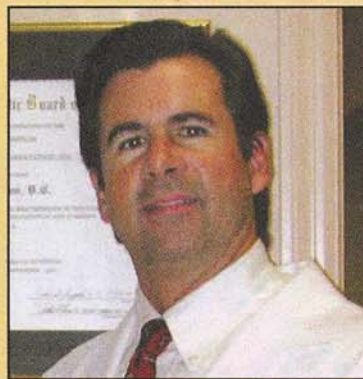

Now you see why this breakthrough discovery is the only one I trust for my own prostate and the only one I recommend to my patients.

Strong, steady urine flow

A healthy prostate means you urinate easily, strongly and empty your bladder on a regular basis

remarkable breakthrough formula is powerfully effective. And that means you can expect quick, yet long-lasting benefits.

First, though, let me give you a simple explanation of why prostate issues *always* lead to urination woes.

As you can see in Illustration No. 1, a normal, healthy prostate keeps your urethra wide open and free-flowing. The result? You can urinate easily and empty your bladder on a regular basis.

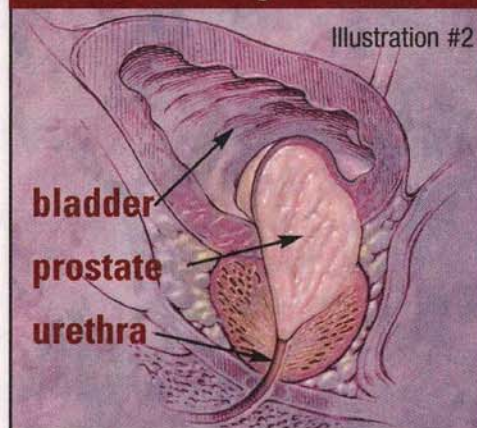

But as Illustration No. 2 shows, prostate issues can squeeze your urethra, making it difficult for you to urinate and empty your bladder.

The good news is, the *Prostate 9 Complex™* is especially effective to ease, relieve and even end the frustration of urination torment, starting with...

**...320 mg of saw
palmetto to help you

your prostate health!**

Chances are good you've heard about saw palmetto as a powerful

Germany's best-kept secret for prostate health revealed

Did you know that in Germany, more than 90 percent of men and their physicians choose natural remedies over synthetics for treating prostate and urination troubles?

Fact is, the German Commission E, the governing body that certifies medical treatments, has endorsed saw palmetto and other herbs as "approved" treatments for prostate concerns.

million a year on saw palmetto supplements. Here's why:

Saw palmetto helps...

- Alleviate urination issues
- Supports testosterone balance which can affect prostate health
- Promote hormone balance which is good news for prostate health
- Safeguard your prostate from poor prostate health

But here's the problem. I believe most men taking saw palmetto just aren't taking high enough doses of it every day...so they're still suffering.

Research shows you should take

320 mgs of saw palmetto every day—and that's exactly what you'll find in a daily dosage of *Prostate 9 Complex*™!

Clinical studies show 320 mgs of saw palmetto does wonders for your urination

For example, a three-year trial⁽¹⁾ in Germany documented that patients taking 160 mg of saw palmetto twice a day (320 mg in all) improved their urinary flow rates significantly!

What's more, in another study⁽²⁾,

UCLA study proves saw palmetto is a “viable alternative” for prostate issues

LOS ANGELES, CA—The first American randomized clinical trial of saw palmetto showed that it reduces symptoms of prostate concerns.

In the study⁽³⁾ at the UCLA School of Medicine, 44 men took either 320 mg of saw palmetto and nettle root, or a placebo, daily.

Those taking the saw palmetto and nettle root experienced reduction in symptoms such as difficulty urinating, incomplete emptying of bladder and frequent urge to urinate.

No wonder Dr. Leonard Marks, who conducted the study, says, “I believe urologists may now consider saw palmetto a viable, natural alternative treatment for many men with [prostate concerns].”

(3)Dr. Leonard Marks, Department of Urology, UCLA School of Medicine. *Urology Times*, June 1999

Health Alert:

Why ordinary saw palmetto won't do the trick!

Don't be fooled! Just any ordinary saw palmetto won't protect your prostate. Remember, you need 320 mg every day—saw palmetto in combination with nutrients such as nettle root can give you even better results. And that's exactly what you'll find in the super potent *Prostate 9 Complex™*.

550 patients with mild to moderate symptoms of prostate concerns took 320 mg of saw palmetto per day for three months.

The results? They experienced...

- a 25 percent increase in maximum urinary flow
- a 20 percent decrease in residual urine in the bladder
- a 35 percent decrease in urinary symptoms
- overall significant clinical improvements

But that's not all. The *Prostate 9 Complex™* is powerfully potent because...

It also includes 240 mg of nettle root which enhances flow and your quality of life

240 mg of nettle root is included in the super potent *Prostate 9 Complex™* for two reasons.

One, this amazing herb balances testosterone which can affect prostate growth.

Two, it works *in combination with* saw palmetto to help improve your ability to hold your urine and urinate better.

For example, in one study⁽⁵⁾, a

Want nearly three times better results for urination concerns? Just take a look...

In yet another double-blind study⁽⁴⁾, 27 patients with prostate issues, between the ages of 49 and 81, took 320 mg of saw palmetto extract, or a placebo, daily.

After only 60 days, those taking the saw palmetto reported a 43 percent increase in urine flow rate compared to only 15 percent in the placebo group. Imagine, nearly three times better results with the miracle of saw palmetto (but don't forget, you need 320 mg a day!).

daily dosage of 240 mg of nettle root plus 320 mg of saw palmetto for 12 weeks resulted in a...

- 26 percent increase in maximum urinary flow
- 44 percent reduction in residual urine
- 62.5 percent reduction in painful urination
- 53.6 percent decrease in post-void dribbling

In another study⁽⁶⁾ at the Institute of Urology in Moscow, 257 elderly patients with urination concerns took 320 mg of saw palmetto and 240 mg of nettle root each day—or a placebo—for 24 weeks.

The results? Using the International Prostate Symptom Score, patients taking the saw palmetto/nettle root combination exhibited a *substantially higher total score reduction* than those taking the placebo. In plain English, they significantly reduced their symptoms of urination issues and improved their quality of life!

This is why the latest breakthrough discovery *Prostate 9 Complex*[™] includes 320 mg of saw

And with these high dosages, you'll not only start seeing improvements right away, but will enjoy long-lasting benefits, too!

protection for your prostate gland.

Did you know your prostate gland naturally contains high levels of the important trace mineral selenium? But as you age, your selenium levels decline drastically, which isn't good for prostate health.

Selenium is essential for prostate health because it produces glutathione peroxidase, a very powerful free-radical scavenger.

Free radicals can damage prostate cells, so you need selenium to help protect your cells and keep your prostate healthy and normal-sized.

The fact is, research⁽⁹⁾ shows that men with higher blood levels of selenium have a lower risk of developing serious prostate issues.

The problem is, we Americans digest very little selenium through our foods, because it's removed during milling of whole grains to white flour and is deficient in most soils in the U.S. And that's why you need added selenium each day.

The result? By taking pumpkin seed and selenium, you arm yourself to fight off prostate and urination

Surprising facts about your prostate and your love life

A number of my male patients tell me that prostate concerns are hindering their love lives and “performance” in bed.

It's easy to see why. A healthy prostate is not only critical for urination—it's *vital* for your love life!

Here's why: The prostate is both a gland and a muscle, and it plays a pivotal role in your sexual satisfaction and pleasure.

important jobs when it comes to your love life:

1 First, your prostate adds special fluid to your sperm before it releases for healthy orgasms

2 Second, it creates seminal fluid that's mixed with sperm before it's ejaculated, providing more than 90 percent of a man's ejaculate

3 Third, with a combination of connective tissue, gland and muscle, the prostate provides the power to pump the semen and sperm through the urethra and out of you

It's simple. A prostate that's not healthy will interfere with your love life; but a prostate that is healthy will make it possible for you to

Three more exciting prostate-protecting breakthroughs

Besides the nutrients I've already mentioned, the cutting-edge *Prostate 9 Complex™* also includes...

✓ **5 mg of lycopene for superior antioxidant protection of prostate tissue**

You may have heard of lycopene, a potent antioxidant found in tomatoes. Laboratory research⁽¹⁰⁾ reveals that lycopene helps keep your prostate tissue cells normal, which is critical for a healthy prostate.

The good news is, *Prostate 9 Complex™* gives you maximum lycopene protection.

This includes a dosage of a full 5 mg of lycopene—to give your prostate even more bullet-proofing protection.

Second, the lycopene used is a special form—the only standardized, all-natural tomato complex that delivers its antioxidant powers in the tomatoes' own oil, just as you'll find them in whole tomatoes. You get nature's most potent form of lycopene for the ultimate in prostate protection!

✓ **150 mcg iodine to help regulate prostate cell activity and growth**

Iodine is vital for your prostate health for two main reasons:

- It's rich in B vitamins, trace elements and minerals to nutritionally support prostate health
- It helps nourish your thyroid, which regulates cell activity and growth, which is very important for prostate health.

✓ **100 IU of Vitamin E to help fight off damage from dangerous free radicals**

Vitamin E is important for two reasons.

One, this powerful antioxidant helps fend off the damage to your prostate from destructive free radicals.

Two, new research suggests vitamin E interferes with two proteins linked to serious prostate problems. In fact, it "disables" the process that causes many prostate problems.

These three exciting prostate-protecting breakthroughs are big news—and make the breakthrough *Prostate 9 Complex™* potent and effective.

health. Here are some of their
common blunders:

**Blunder No. 1: Ignoring the
symptoms
and doing nothing**

It's disturbing to me how many
men think urination troubles,
prostate concerns, sleeping
difficulties and even "performance"
anxiety in bed are normal. They
just sit back and accept it—and do
nothing to prevent these
problems. This should never be!

**Blunder No. 2: Relying
on weak,
watered-down, obsolete
prostate supplements**

As I told you earlier, most of the
prostate supplements you find in
the supermarket or health food
stores are either missing key
nutrients...have dosages (especially
of saw palmetto) that don't meet
clinical study amounts...or are
based on old research. So you can
be taking fistfuls of these ordinary
prostate supplements and getting

only minimal results. That's not
good enough!

**Blunder No. 3: Hoping the
problems will
just go away by themselves**

Not gonna happen! The fact is,
prostate and urination issues get
worse with age. Some men do
nothing until a real emergency
strikes them.

**Blunder No. 4: Not admitting
they have
prostate worries because it's
embarrassing**

I can't tell you how many men
I've treated who've been hiding
their urination, prostate and
bedroom issues—and don't want
to tell a doctor. I often don't see
them until they can't take the
suffering any longer.

You can easily avoid these four
common and risky blunders by
taking the super potent *Prostate 9
Complex™*. No natural prostate
formula gives you more prostate
health and protection to banish
urination troubles, sleep
disruptions getting up at night and
"performance" anxiety in bed than
this one.

have been used in France, Germany and Austria for more than 30 years to boost prostate health.

The main benefits are that it...

- Helps alleviate prostate worries thanks to the beta-sitosterone, oleanolic acid and ursolic acid that help your body properly respond to inflammation
- Blocks enzymes, such as 5-alpha reductase, that cause prostate worries

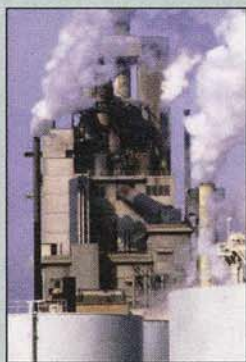

What's more, these benefits were proven in a multicenter study⁽¹¹⁾ in central Europe. In the

study, 85 patients with prostate and urination problems took pygeum.

The results? A 40 percent improvement in the International Prostate Symptom Score...a 32 percent improvement in the quality of life...and a 32 percent improvement in nighttime urination frequency.

But the research that really caught my attention is a double-blind clinical trial⁽¹²⁾ done in Italy. This study showed that pygeum can improve the ability of men with prostate issues to attain and sustain erections—thus enhancing their

Prostate Health News:

New risk of toxins harming your prostate

One reason we're seeing such a rise in prostate concerns is the hidden danger of toxins that our modern world spews at you from all sides.

The fact is, toxins in chemicals from pesticides, smog, tap water, household chemicals, coffee, tobacco, alcohol and food preservatives can really do a number on your prostate.

In addition, parasites, bacteria and viruses can also add to your body's overall toxic load.

Left unchecked, a thick layer of toxic material builds up on your intestinal walls—like the sludge in sewer pipes. This reduces your

absorption of crucial nutrients and prevents the normal function and movement of your intestines.

Worse, it creates a breeding ground for parasites, which can actually eat right through your colon and allow toxins to flood into your organs and bloodstream.

If that's not bad enough, your prostate, which sits right next to your colon, is a frequent and easy target of toxins. These toxins can make your prostate very unhealthy and vulnerable to all sorts of issues.

But the good news is, the exclusive nutrients and herbs found in the unique *Prostate 9 Complex™* help reduce the unhealthy buildup of toxins in your system and boost and protect your prostate health.

love lives.

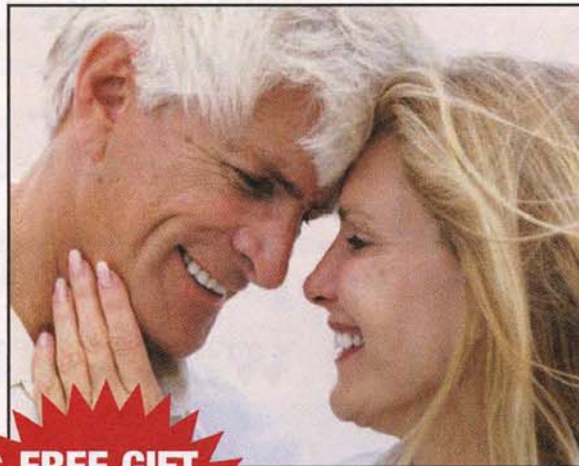

✓ **15 mg of zinc for increased prostate protection and pleasure**

In addition, this one-of-a-kind formula includes zinc. Did you know the human prostate is a zinc-rich gland?

The fact is, your prostate concentrates *roughly 10 times* more zinc in its tissues than any other organ in your body.

Zinc is a key antioxidant you need for maximum prostate protection. In addition, it helps block enzymes and hormones that lead to prostate and urination concerns.

We also know that a zinc

deficiency can cause lowered sexual desire.

What's more, as detailed in the book, *Minerals: The Metabolic*

Miracle Workers, zinc supplements can significantly increase the intensity of male orgasm.

Two great benefits!
