**"Light-years ahead of ordinary CoQ10 and resveratrol.
Now, you can get**

8 times more rejuvenating power

**to boost your heart, brain and energy,
and promote more youthful vitality!"**

***** A SPECIAL REPORT *****

by Dr. Mark Stengler

My Dear Health-Smart Friend,

When I first saw Frank*, he was a shell of his former self after suffering a heart attack.

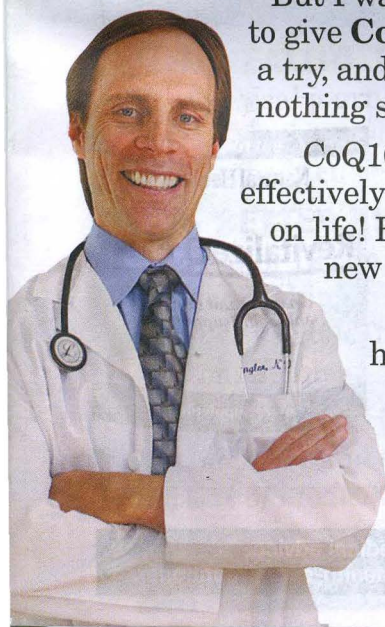

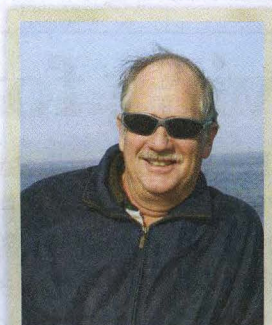

He was tired, lacked the vitality of his younger years and was unable to work at his beloved nursery. He was also skeptical of natural supplements.

But I was able to convince Frank to give **Co-Enzyme Q10** (CoQ10) a try, and what happened next was nothing short of a miracle.

CoQ10 revitalized Frank so effectively that he had a new lease on life! He looked and felt like a new man!

Frank's story, which happened some 20 years ago, shows you the power of nutritional medicine.

But that was then.

Dr. Mark Stengler,
pioneer in natural medicine

Now, modern medical advances mean...

**You can enjoy even greater
health miracles!**

It's now possible for you to
boost your heart health...
promote mental sharpness...
revitalize your energy...and
regain your youthfulness **in
even more powerful ways.**

How? With new advances
in CoQ10 and **resveratrol**—the miracle
molecule first found in red wine.

Most people only know part of the story of
these breakthroughs, so read on for...

- ▶ A **better form** of CoQ10 clinically tested to be **8 times** easier to absorb
- ▶ A **better source** of resveratrol—surprise, it's *not* red wine or grapes
- ▶ A revolutionary new way for you to get the most active and concentrated forms of CoQ10 *and* resveratrol—the very same forms I give my patients—in one capsule.

For years, my patients and I have enjoyed the full, age-defying, health-boosting benefits of CoQ10 *and* resveratrol—**and now, it's your turn.** **Please read on...**

**Feel younger
and stronger
in 30 days—
GUARANTEED!**

*While all stories are fully documented, only first names are used to preserve privacy.

The truth you're NOT hearing about CoQ10 and resveratrol

(and a simple secret that unleashes their full rejuvenating power for you)

If you're taking CoQ10 and/or resveratrol, you're off to a good start. After all...

■ Clinical studies document CoQ10's unique ability to revitalize your heart...support normal blood pressure, your immune system and even brain health...and safeguard your body from age-robbing free radicals.

As seen on
60 Minutes!

■ Most Americans were first introduced to resveratrol on *60 Minutes* as the miracle molecule found in red wine. Some scientists believe it helps the French live healthier and longer than Americans.

More recently, scientists at Harvard reported this wine molecule activates a particular enzyme known as the "longevity gene." This research is exciting and gives us a glimpse into how we may

be able to "slow the aging process."

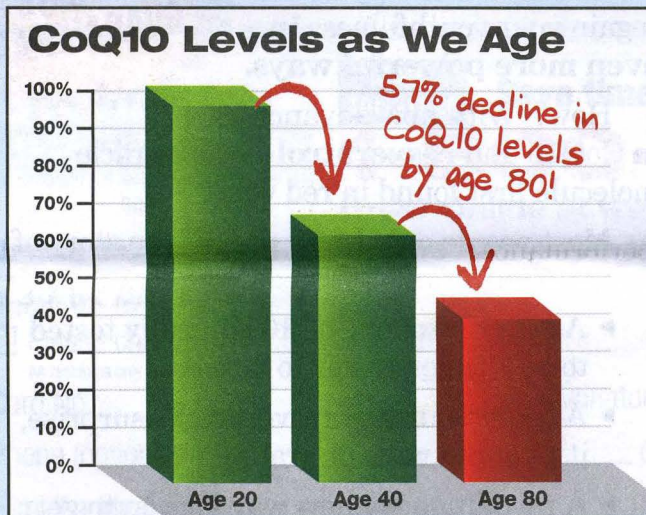

No wonder sales of CoQ10 and resveratrol have soared. Yet shockingly...

The way most people take CoQ10 and resveratrol falls way short!

This is a travesty because I've seen first-hand how these two breakthroughs in natural medicine can do wonders for your health, vitality and youthfulness.

That's why I'm excited to tell you that, for the first time, you can take the same special form of CoQ10 I now give my patients—plus a better source of resveratrol—in my exclusive, new formula for **Bottom Line Natural Healing™ RevitalizeQ Plus™**.

Is your heart starving for CoQ10?

Did you know at age 20, your heart has all of the CoQ10 it needs each day to beat 100,000 times and pump 2,000 gallons of blood through its chambers?

But by age 40, you have just 68.2 percent of

the CoQ10 your heart needs. By age 80, you have only 42.9 percent—less than HALF—your heart needs...so your heart is likely starving for more CoQ10.

As you age, your heart's CoQ10 levels diminish due to an unhealthy diet, environmental toxins, statin drugs, and even mental stress.

Now you can replenish your body's CoQ10 levels and energize your heart with the most highly bioavailable CoQ10 on the market in Bottom Line's brand-new **RevitalizeQ Plus!**

Guaranteed to help you feel younger and stronger in 30 days, or it's FREE!

It's brand new, and as one of my readers, you're invited to try it RISK FREE!

In a moment, I'll tell you how my new formula, **RevitalizeQ Plus**, includes unique, more powerful forms of CoQ10 and resveratrol which can help you feel younger and stronger in just 30 days—guaranteed.

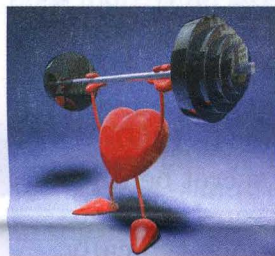

But first, let me answer this important question: Why do you need CoQ10 each day?

Because it's the most powerful natural antioxidant for:

- (1) **Increasing the ATP** (adenosine-5-triphosphate) energy output in your cells, which is desperately needed by your heart, brain and all of your cells—95 percent of your body's energy is generated this way
- (2) **Effectively suppressing** age-robbing free radicals.

Remarkably, when you start taking CoQ10, you can create your own health miracle. In fact...

Studies show the energizing power of CoQ10 for giving you...

► **A STRONGER HEART:** In an international study of 2,660 people, nearly 80 percent of those taking CoQ10 saw an increase in overall heart health when compared to the placebo.

► **HEALTHIER CHOLESTEROL:**

The medical journal *BioFactors* reports that CoQ10 has been shown to inhibit the oxidation of LDL "bad" cholesterol.

► **BETTER BLOOD PRESSURE:** In a review of 12 clinical trials involving 362 patients, taking regular CoQ10 was shown to improve systolic (top number) and diastolic (bottom number) blood pressure.

► **INCREASED ENERGY PERFORMANCE:**

In a double-blind study reported in *Molecular Aspects of Medicine*, cross-country skiers took

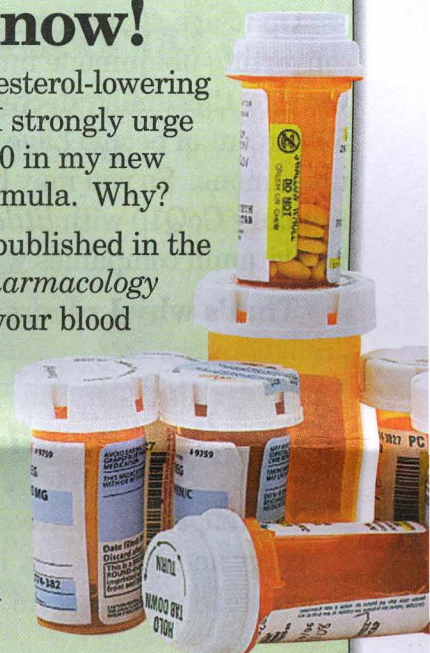

WARNING: If you're taking statin drugs, read this now!

If you're taking cholesterol-lowering statin drugs, then I strongly urge you to also take CoQ10 in my new **RevitalizeQ Plus** formula. Why?

A shocking study published in the *Journal of Clinical Pharmacology* shows statins *reduce* your blood levels of CoQ10 by as much as 40 percent!

CoQ10 and cholesterol share a common pathway. So when you block cholesterol production with statin drugs, you *also* block CoQ10 production. And maintaining your CoQ10 levels is important to your overall health and well-being, including your heart health.

And, according to Dr. Peter Langsjoen, one of the pioneers in CoQ10 therapy, CoQ10 deficiency caused by statin drugs can be improved by taking CoQ10 supplements!

90 mg of regular CoQ10 or a placebo—and 94 percent of those who took CoQ10 boosted their performance.

That's why everyone over the age of 40 would be crazy not to take CoQ10! And now...

There's a better way for you to take CoQ10: 8 times easier to absorb!

For years, I've prescribed a special form of CoQ10 for my patients which is **light-years ahead of most CoQ10 supplements you can buy.**

The most common form of CoQ10 is called

(Continued on next page...)

“ubiquinone.” But for ubiquinone to be fully utilized by the “energy cells” in your body, it must be turned into its active form, known as “ubiquinol.”

Up to age 40, your body has no trouble converting ubiquinone into ubiquinol. But as you age, this ability decreases. Worse, up to 50 percent of people have problems absorbing ubiquinone. **So you may be taking fistfuls of ordinary CoQ10 with little or no results!** Believe me, vitamin companies won't tell you this!

That's why I recommend the more

Success story:

“Excellent result from unexpected source!”

“Dr. Stengler’s prescribed CoQ10 improved my energy and reduced my heart palpitations. It’s an excellent result from an unexpected source.”*

—P.W., San Diego, CA

Success story:

“Within a week, I felt younger!”

“I began taking CoQ10 [ubiquinol] daily two months ago and noticed an immediate change in energy level and mood. Within a week of taking CoQ10 I felt younger and now have positive self-esteem.”*

—L.S., Santee, CA

Success story:

Heart pumping much better!

“Since taking CoQ10 ubiquinol, my ejection fraction [how much blood your heart is pumping out] has increased significantly, and my heart symptoms have also been reduced. I can now walk up stairs (3 flights) without any shortness of breath, and I walk without any discomfort. My blood pressure has also been reduced and I feel great.”*

—P.K., Murrieta, CA

* Results not typical.

bioavailable form of CoQ10 ubiquinol which requires no conversion by your body—so you instantly get the most active form of CoQ10.

Research shows that ubiquinol is a superior form of CoQ10—it effectively supercharges your cellular energy output and suppresses free radicals.

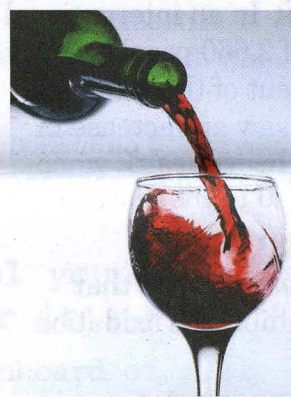

Even better, the unique chemical structure of ubiquinol makes it more water soluble and thus easier for your body to absorb. In fact, ubiquinol has been shown to be up to 8 times more absorbable than ubiquinone.*

The result? You can flood your body with 8 times more CoQ10 to power up your heart health, energize your brain and support your immune system, to fight free radicals, and supercharge your life.

Even better...

For the very first time I know, CoQ10 ubiquinol has been combined with a more potent form of resveratrol!

My exclusive, new formula **RevitalizeQ Plus** takes you beyond ordinary CoQ10 with ubiquinol, and it *also* gives you a breakthrough in super health and longevity—**resveratrol!**

Resveratrol first made headline news in the early 1990s as the secret behind “The French Paradox.” The French typically eat a lot of rich foods and drink wine daily. Yet their overall cardiovascular health is superior to many

Americans. Resveratrol—a natural substance first found in grapes and red wine—may be the key to these unique anti-aging benefits.

Interest in resveratrol exploded in 2003 when Dr. David Sinclair of Harvard Medical School reported that resveratrol activates the “longevity gene.”

* Study results based on a 300 mg dose.

Resveratrol...as seen on 60 Minutes!

"As CBS' 60 Minutes reported, scientists across the country have identified a substance in red wine called *resveratrol* they believe might do more than just protect the heart, but could, in very high concentrations, significantly extend life by helping to prevent age-related health conditions.

"If they're right, we all may soon be taking a pill that could give us an extra decade or two of healthy old age," as reported on CBS News.

Newsweek reported, "A compound found in red wine may extend human life span." *Fortune* headlined: "Drink wine and live longer." And you've likely heard about resveratrol on *Oprah*, *Dr. Oz* and other national TV shows.

As you can imagine, sales of red wine and resveratrol rocketed. And now, new studies suggest that...

Resveratrol helps promote heart health, brain function and circulation

New scientific research suggests resveratrol does more than trigger the longevity gene. It also helps...

■ **Promote proper inflammatory response:** Controlling inflammation is an important part of maintaining your overall health and well-being. In a new study published in the *Journal of Clinical Endocrinology and Metabolism*, individuals taking 40 mg of resveratrol had a significant reduction in two major factors causing inflammation.

■ **Increase circulation to the brain:** To help maintain brain health as we age, it is important to keep the blood flowing. In a new study reported by the *American Journal of Clinical Nutrition*, patients taking 40 mg of resveratrol experienced an increase in blood flow to the brain as quickly as 45 minutes after taking it.

■ **Support cardiovascular health:** Promoting increased circulation is also part

(Continued on next page...)

Live longer and better with resveratrol?

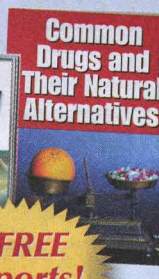

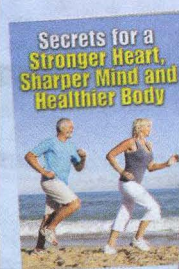

Harvard researchers say it's possible!

How does resveratrol increase your health and longevity? Harvard researchers say it seems to work in the same way as drastic calorie reduction.

The life span of mice, rats and monkeys has been shown to increase when their calories were dramatically cut. Reducing normal food consumption by 30 percent to 40 percent activates the "longevity gene" called *Sir2*.

So now, the *Harvard University Gazette* reports, "If resveratrol and related molecules are found to work as well in humans, we could gain extra years of healthy life without starving for them." Further research will tell if resveratrol has the same benefit for us.

of maintaining heart health. Great news! In another new study published in *Nutrition, Metabolism & Cardiovascular Diseases*, overweight subjects taking resveratrol enjoyed increased blood flow and significant increases in dilation of blood vessels—all of which help cardiovascular health.

So, should you drink lots more red wine or take more resveratrol? Not so fast!

Yes, resveratrol is found in grapes and red wine. But those aren't your best sources.

The truth is, you have to drink **cases of red wine** to get enough resveratrol you'd need each day. The Linus Pauling Institute reports

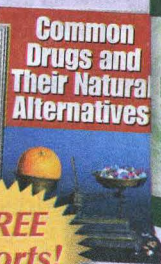

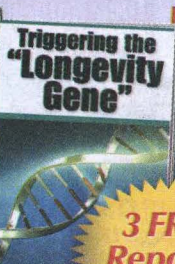

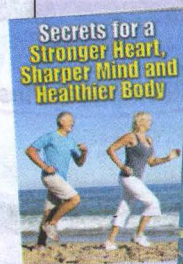

Best way to get 100 mg of resveratrol each day

■ **OPTION No. 1:** You could drink red wine—lots of it. In fact, **you'd have to drink about 50 bottles a day to get 100 mg of resveratrol.**

■ **OPTION No. 2:** Or, you could take a daily serving of my new **RevitalizeQ Plus** formula—delivering 100 mg of the most potent source of resveratrol!

that a whole liter of red wine (a little more than a quart) gives you less than 2 milligrams of resveratrol—that's all!

To put it another way, to get 100 mg of resveratrol you'd need each day, you'd have to drink 50 bottles of red wine!

Resveratrol supplements? You'd better carefully read the label to make sure you're getting the proper dosage and the most concentrated source of resveratrol—and that's not from red wine or grapes.

Beyond ordinary resveratrol!

The best and most concentrated source of resveratrol is *Japanese knotweed* (*Polygonum cuspidatum*). This little-known plant produces more resveratrol, by weight, than what is found in grape skins, husks or red wine.

▲ **Japanese knotweed**

What's more, Japanese knotweed is a source of "trans resveratrol"—which scientists believe is the most potent form of resveratrol you can take.

And that's why this is the only resveratrol I recommend to my patients, and is the same source of resveratrol you'll find in my exclusive, new **RevitalizeQ Plus** formula.

Yet to feel younger and healthier, you need to fight premature aging at all levels—especially as it relates to free-radical damage. That's why my new **RevitalizeQ Plus** also includes...

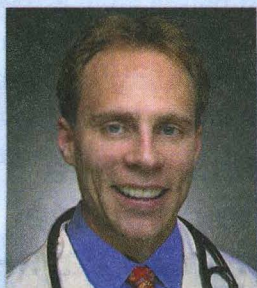

The most potent of all age-fighting antioxidants: Grape seed extract

It's a fact: To slow down premature aging and feel younger and stronger, you *must* stop free radicals. Nothing ages you faster than these destructive molecules which cause oxidative damage to your cells.

The good news is, special compounds in grape seeds known as OPCs (*oligomeric proanthocyanidins*) are **the most potent** of all antioxidants to quell age-robbing free radicals.

capsule. These include...

► **Açaí fruit extract:**

The tiny fruit from this Brazilian palm tree is hailed as a potent antioxidant to help you better fight aging.

► **Alpha-lipoic acid:**

A remarkable antioxidant that’s both water and fat soluble—to help keep the inside *and* outside of your cells young and healthy.

► **Pomegranate fruit**

extract: The juice of this fruit, known since Biblical times, has been shown to have antioxidant activity three times that of red wine or green tea.

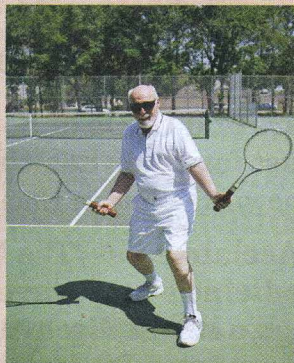

► **Quercetin dihydrate:**

A flavonoid found in onions and apple skins, it’s a robust antioxidant that helps prevent oxidation of LDL “bad” cholesterol.
