

This kills malignant cancer cells in droves

They weren't supposed to have cancer...

But time and time again it was popping up.

During autopsies for causes completely unrelated to cancer, like car crashes, drownings and accidents...

Coroners and medical examiners were spotting tiny, microscopic tumors... you could call it **"Ghost cancer."**

At the time, the prevalence of verified prostate cancer in men and breast cancer in women was only 1%...

Yet, tumors you could fit on the head of a pin were turning up in 39% of middle-aged women and nearly 50% of senior men.

In fact, these ghost cancer cells were also turning up in the thyroids of ***nearly 100% of people between the ages of 50 and 70...***

So what are ghost cancer cells and what can trigger them to grow into deadly tumors?

As a young medical examiner and forensic pathologist in the 1980's, I found myself right in the middle of this ***strange mystery*** and often witnessed it with my own eyes...

And later, as a researcher at the ***National Cancer Institute...***

I saw how **"Ghost Cancer Cells"** helped reveal one of the most powerful cancer treatments of our time.

A natural treatment that's been reported by patients and doctors to ***melt tumors...***

Extend life in some of the most hopeless cases...

And, as you'll see in a moment, it's more powerful with a unique way of fighting tumors than some of the most popular drugs in existence... but with ***little to no side effects.***

Unfortunately, I also saw the research and studies on this amazing breakthrough get dismissed and passed over... but all that changes today.

Hi, I'm Dr. Marc Micozzi for *Insiders' Cures*.

And if you or a loved one were ever worried about cancer, then you're about to learn how this underground treatment could ***completely change your life.***

You'll also learn how it's quietly changing the lives of countless patients as we speak.

But first, let me explain how the investigation of ghost cancer in the 1980's helps us understand this ***amazing leap forward in cancer treatment.***

Now, ghost cancer *by itself* isn't deadly...

In fact,

**It's likely you have ghost cancer cells
inside you *right now***

Why?

Because your cells are ***constantly multiplying and dividing***...

In fact, they do this so much that all your cells are ***completely*** replaced every 7-10 years.

And every now and then, a number of cells can get mutated in the process.

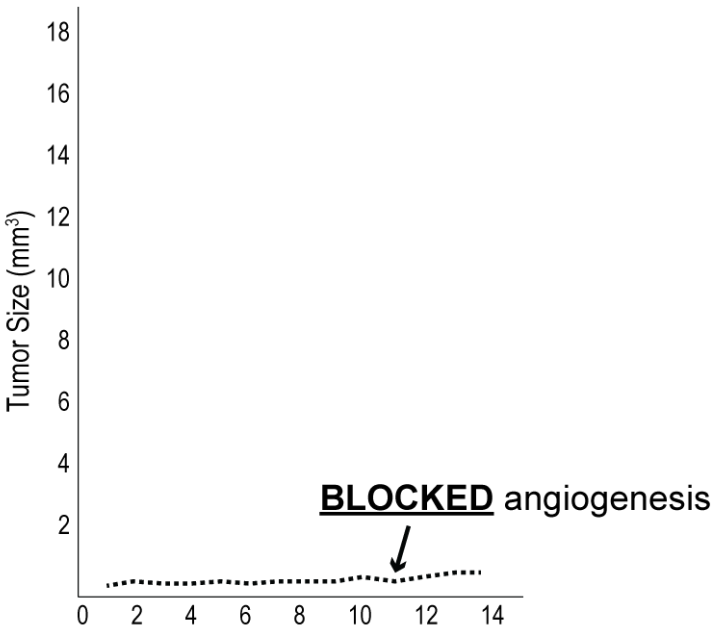

Often, these mutated cells will eventually kill themselves, or be killed by your immune system, for the good of the healthy cells.

But sometimes, these cells can trick the body into forming new blood vessels which branch out and leach onto your own blood supply.

From there, they grow and grow into the ***deadly malignant tumors*** you know as cancer.

It's a process known as angiogenesis.

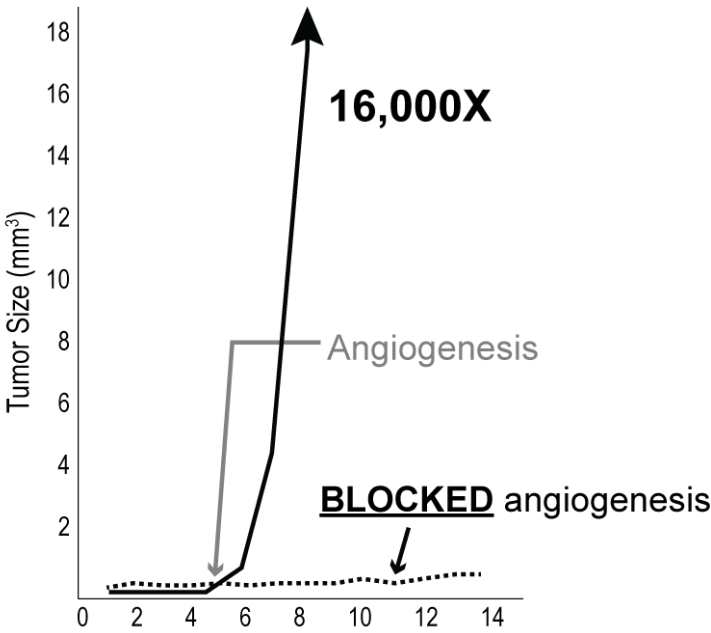

As long as angiogenesis doesn't take place, the tumors stay so small that they can't cause any problems.

These are like the cells that coroners were finding in car crash victims and other accidents.

Like the microscopic cancer cells that ***could be inside you right now***.

And, as soon as these ghost cells are given a lifeline...

Boom. They can grow ***16,000X*** their original size in just *days*.

It's a process that was completely new to oncologists before the 1980's...

It was a discovery that pointed to a new cause of cancer, along with diet, family history and environmental factors...

But even more importantly...

**It was a discovery that pointed to
cancer's greatest weakness**

Why?

Because even if the ghost cells that could be in your body manage to tap into your body's blood supply and begin growing...

The blood vessels that ghost cancer cells manage to build for themselves aren't like normal healthy blood vessels in other parts of the body.

They're poorly constructed and weak. Which leaves them vulnerable to attack.

And this opens the door to a completely new and innovative way of **destroying cancer...**

Instead of attacking the cancer cells themselves (and harming healthy cells in the process), why not attack their lifeline... and starve the cancer cells to death?

Luckily, **this is no longer just a theory.**

In fact, I was on the frontlines of studying some of the earliest known natural substances that turned out to kill cancer cells by stopping angiogenesis in its tracks.

At the time, we weren't even quite sure how it worked... we just knew these substances **had the power to stop cancer.**

And since then, studies involving tens of thousands of participants from places like Harvard, University of Milan, The Mayo Clinic, University of Chicago, and many others are showing these natural substances can...

- ✓ Reduce risk of Non-Hodgkins Lymphoma by 40%
- ✓ Slash risk of colon cancer by 44%
- ✓ Decrease risk of prostate cancer progression by 59%
- ✓ Slash lung cancer risk by 62%
- ✓ Decrease esophageal cancer by 66%

I'm just naming a few but the list goes on and on.

And the power of halting angiogenesis goes much further than simply lowering the risk of some of the deadliest cancers known to man.

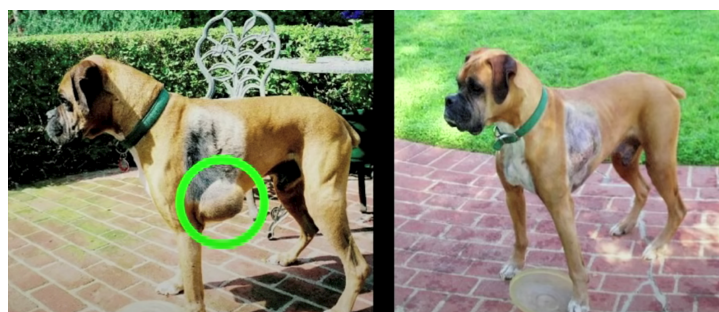

In fact, even when ghost cells grow into full blown tumors, there's still hope.

A group known as the Angiogenesis Foundation has presented studies using a combination of oral and topical anti-angiogenic drugs which shrunk a deadly malignant tumor the size of a grapefruit on this dog, Milo...

To **virtually nothing** in just 7 weeks.

Milo was originally only given 3 months to live by his vet.

But after treatment, they were able to extend his life by **6 times** what his veterinarian had predicted.

They used a similar treatment on a very deadly cancer known as angio-sarcoma on the lip of a horse...

Six months later the cancer was in **complete remission.**

And a full **6 years later**, the horse was still alive, healthy and **cancer-free**.

Of course, these are promising results in just a couple of cases involving animals...

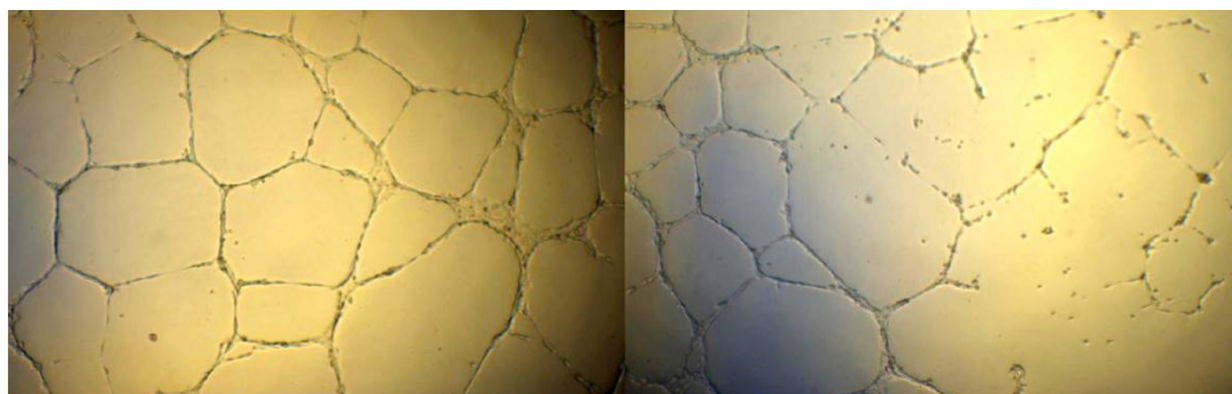

But what about humans?

Enter one of the most powerful natural anti-angiogenesis treatments on the planet... known as Anti-A therapy.

The Angiogenesis Foundation estimates an ingredient with high levels of Anti-A is stronger than 4 drugs prescribed for cancer in terms of lessening tumor angiogenesis.

And when viewed under a microscope, you can see how...

Anti-A absolutely pummels blood vessels used by ghost cancer cells to feed and grow

Before Treatment

After Treatment

It hones in on these blood vessels like a **heat seeking missile** and leaves your healthy cells virtually unscathed.

This is why there are virtually no side effects.

And the effect it has had on patients is **remarkable**.

Anti-A was first tested on 100 terminal cancer patients that were considered **lost causes**...

Meaning doctors had officially declared their cancer **untreatable**.

Their life expectancy was compared against a control group of similar patients who were also untreatable and receiving typical end of life care, but no Anti-A therapy...

And the results were unheard of.

Anti-A boosted survival time more than 4X in patients once considered hopeless!

This meant **adding over half a year of life** on average to the treated patients.

Which may not sound like a lot... but these patients also reported a higher quality of life than the control.

And to terminal patients, ***any amount*** of precious time in comfort spent with their loved ones is a blessing.

But instead of celebrating and getting the word out to the public... ***oncologists balked and questioned the study.***

So to show the results weren't some sort of fluke or medical anomaly... Anti-A researchers set to work repeating the study with 100 new patients.

Again, the patients were considered terminal and were treated ***exactly*** the same as the control patients other than being given the Anti-A therapy.

And to be fair, the results were a bit different this time... instead of boosting survival over 4X...

The second Anti-A study showed an even bigger 7X boost in survival time!

Meaning they lived an average of almost one year longer than the non-treated patients... with 22% living as much as 2.5 years or longer!

And again, these patients had been considered ***untreatable*** at the start of the study... the worst of the worst.

They also suffered from multiple different cancers including breast cancer, kidney cancer, colon cancer and bladder cancer to name a few.

And you don't have to search hard online to find cancer patients whose lives have been ***completely changed*** by Anti-A therapy.

Arthur Hemmer was in his early thirties when he was diagnosed with blood cancer that had spread to his bone marrow.

He went through ***grueling rounds of chemo*** but the cancer kept spreading.

Afterwards, doctors gave him just 4-8 weeks to live...

He left the hospital and immediately changed his diet, anything to give himself a few more weeks with his family.

That's when he also decided to try Anti-A therapy. But he wasn't hopeful.

In fact, he was still planning his own funeral between treatments.

But when he went back to visit his oncologist, he ***got the shock of his life...***

After just a few weeks of Anti-A therapy his blood tests were now completely normal

It's a rare outcome that would shock any doctor.

But even Arthur's own doctor had to admit... "you wouldn't know there was anything wrong with him."

And Arthur isn't the only one...

Peter Fanning was already in the intensive care unit with double pneumonia when doctors found something even more unsettling...

His body was wracked with an aggressive form of leukemia.

Doctors informed his family there was nothing they could do. Peter would likely die there in the hospital.

But his family was determined to save Peter's life.

They demanded he be given the Anti-A Therapy, and that's when ***everything changed.***

After just two days his lungs were **dramatically** improved, weeks later Peter was eating on his own.

And after a few months...

Peter's body was completely free of all cancer!

The doctors were amazed, according to Peter, they put his odds of survival at one in a billion.

And finally, there's Alison Hall...

After having surgery for colon cancer, she was told she also needed to undergo **grueling rounds** of chemo and radiation.

But she wanted something different...

So she gave the natural Anti-A therapy a chance.

And eventually when she visited her oncologist she was given the great news...

Alison's tests showed her colon cancer was in complete remission.

So with results like this repeated in study after study...

With research showing that Anti-A therapy can **attack cancer cells' lifeline** while leaving healthy cells alone...

With evidence showing it can shrink tumors to **almost nothing**...

And do it all with virtually no side-effects.

Why haven't you heard of Anti-A therapy?

One reason is because many experts simply didn't want to believe the research.

In fact, they performed studies of their own using **much lower doses** of Anti-A for **much shorter periods of time**...

And when the results didn't line up, that was all the proof they wanted to discount it.

It took me years to finally convince my colleagues at Thomas Jefferson University Hospital that Anti-A was safe and effective...

And now they're proud to offer this natural treatment for cancers of all kinds.

And they're not the only ones, recently big pharma has started to pour **billions into research**.

But you don't have to wait **decades** for the results...

Because I've made it **my life's goal** to ensure that patients have all the information they need on breakthroughs like Anti-A therapy.

That's why today, I'm releasing a new book with life-changing natural treatments for **America's deadliest diseases**.

It's called **The Circle Of Life: A pathologist's guide to living life and cheating death**.

It's 576 pages, and inside you'll find everything you need to know about this **powerful weapon against cancer**...

As well countless other **life-changing treatments** your doctor has likely never heard of.

And in a moment, you'll learn how you can get it **FREE** through this special offer.

But first, let me tell you a little more about myself.

I've been in natural medicine for **nearly 4 decades**.

I've worked as the Executive Director for Integrative Medicine at Thomas Jefferson University Hospital, was named Distinguished Scientist and Associate Director of the Armed Forces Institute of Pathology and was a Senior Investigator at the National Cancer Institute.

I've contributed to *The Washington Post*, *New York Times*, NPR, CBS and Good Morning America to name a few.

But it was early on in my career, as a forensic pathologist and medical examiner, that I learned to take a step back and look at disease in a completely different way.

I found that by focusing on how a disease injures, harms and ultimately kills the body...

You can discover the key to successfully **treating** the disease.

It's the exact opposite from **the tunnel vision approach** of mainstream medicine today.

I find that modern day health professionals simply don't grasp how different diseases are actually affecting patients' entire bodies.

And time and time again this confusion leads them **down the wrong path** in *dealing with* those diseases.

That's why today I want to reveal to you...

5 Diseases Modern Medicine is Getting **DEAD** Wrong

We've already discussed the first: **Cancer**.

But when it comes to the mainstream medical establishment getting it **completely wrong** for decades, there's another disease I think is just as bad **(if not worse)!**

It was first discovered in 1906...

And as of 2019, only 5 treatments have been approved by the FDA.

Yes, only 5 treatments in over a century of trying... and those 5 only bring mild, temporary relief.

Of course, I'm talking about **Alzheimer's dementia**.

To put things into more perspective, there hasn't been a new drug approved for this horrible disease in **almost two decades**.

And that's despite more than 500 clinical trials during that time.

In fact, it's gotten so bad, some pharmaceutical companies are even starting to **abandon** research on Alzheimer's altogether.

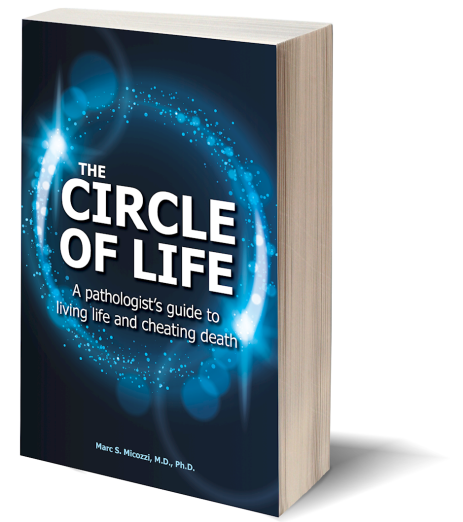

And if there's one thing all of this failed research has in common... It's the **stubborn focus** on beta-amyloid plaques above all else.

As a pathologist, I saw flaws in this singular focus decades ago.

Including the fact that this supposed main culprit behind the disease...

Was also showing up in **countless autopsies** of people with no record of cognitive decline.

It was a giant red flag that the mainstream's **assumptions about Alzheimer's were off**.

It's clear that after ***a century of failure***, a completely different approach is needed to finally treat Alzheimer's.

And today, I want to tell you about ***a group of forward-thinking doctors and medical researchers*** who have discovered a unique approach.

It's a method that's led to a treatment with ***so much promise...***

Harvard-trained researchers believe they can delay Alzheimer's symptoms until the age of 120!

And it all starts with ***an elite team***, including Harvard-trained researchers... and a stunning discovery they made on the island of Guam.

An island where the inhabitants are ***100 times*** more likely to experience symptoms from neurodegenerative diseases like Alzheimer's, ALS and Parkinson's.

The team was determined to find out the reason why...

And if that reason might be ***the key to finally treating Alzheimer's***.

It didn't take long until a prime culprit appeared.

They discovered the islanders' diet was loaded with massive levels of a natural toxin known as BMAA.

It was a good start, but they needed to find out if there was a link between this toxin and Alzheimer's.

So they tested a diet high in BMAA on a group of monkeys and made ***a huge discovery...***

The monkeys fed with the toxin soon started developing Alzheimer's symptoms as well as so-called "tangles" in their brain.

It was a Eureka moment that will change Alzheimer's forever!

And a finding that left the team speechless.

Why? Because for ***decades*** researchers thought of "tangles" as the true ***cause*** of Alzheimer's disease...

But this was now showing ***a new possibility***... The tangles were actually a ***symptom*** of the BMAA toxin... which was itself the true cause.

Their theory was soon bolstered by the discovery of BMAA in the brains of people who had died of neurodegenerative disease in Guam...

And it was also turning up in the brains of Canadian Alzheimer's victims.

Even scarier, varying levels of BMAA are found ***virtually everywhere...*** from Florida to Ohio to Yellow Stone National Park.

It's found in everything from the water we drink to the foods we eat.

And no one is currently testing for it.

But here's the ***good news***.

This discovery has led to a revolutionary new way to prevent and treat Alzheimer's

Let me explain...

When researchers looked at how BMAA affects memory, they found something ***amazing***...

BMAA was ***hijacking*** a critical amino acid directly related to memory in the brain.

I call it the AZ-amino acid.

This swapping of the healthy AZ-amino acid for the BMAA neurotoxin, caused the brain to fold and tangle...

Which then led to the classic symptoms of Alzheimer's.

It's like filling your gas tank with diesel instead of unleaded... the car will eventually shut down.

So the Harvard-trained researchers had an idea, what if they were to ***increase*** the amount of the healthy AZ-amino acid in the brain...

Could they protect the brain from tangling in the first place and counter the effects of Alzheimer's?

And that brings us back to the experimental monkeys from earlier.

At the same time the researchers were feeding a group of monkeys a diet high in the BMAA toxin...

They were also feeding ***a second group*** of monkeys both the BMAA neurotoxin ***AND*** the AZ-amino acid.

And here's where things get ***truly amazing***...

The group eating both the diet high in the neurotoxin and the AZ-amino acid had 80-90% fewer tangles in their brain!

It was as if the healthy amino acid was essentially protecting the brain's vital neuroproteins from the BMAA toxin.

But the researchers weren't satisfied yet.

Afterall, this was a result not seen in ***any Alzheimer's drugs*** to date.

So, they decided to run the study a second time and ***doubled*** the number of research monkeys...

And over and over again they continued to get similar results.

They had not only found a potential new cause for Alzheimer's... but ***an exciting new way to treat it!***

And a new study out of France is confirming their work.

Researchers from the University of Paris found that mice in the early stages of Alzheimer's disease show a significant deficit in the AZ-amino acid...

Which is ***directly linked*** to problems with memory... Specifically spatial memory, which is responsible for following directions and navigation.

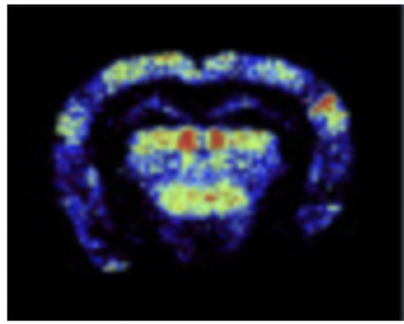

But the researchers found that when they added the AZ-amino acid to the diet of the mice... that area of the brain was ***completely restored***.

They were now able to zip through mazes like they'd never had any problems at all.

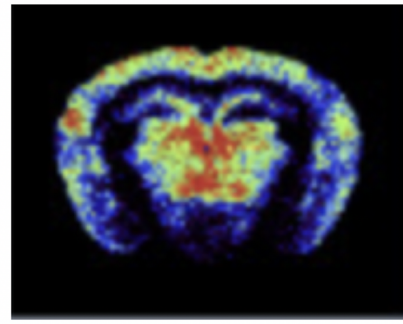

Even better, the researchers took brain scans of the mice and compared them against a group who did not receive the AZ-amino acid.

And you have to see the results to believe them.

The AZ-amino groups' brains were firing on all cylinders!

Control Group

AZ-amino acid group

It was a **remarkable** result.

But perhaps most convincing is what the Harvard-trained researchers found on another island that was almost the **exact opposite** of what they discovered in Guam.

A village with no reported cases of Alzheimer's.

And when they studied their diet, the results **almost jumped off the page...**

The locals were getting 4-times the AZ-Amino acid compared to a typical American!

Essentially what these researchers have stumbled onto, is a simple, natural, oral supplement that **anyone can take to help fight Alzheimer's** and memory loss.

It's **so simple you can sprinkle it onto your breakfast** each morning.

Just imagine one simple step that could **erase the fear of Alzheimer's...**

And boost the memory of a loved one.

It's a step that countless people are already taking... and you don't have to look hard online to find their stories.

Barbara Allen had been experiencing memory problems and was looking for something natural to help with her symptoms.

After reading about the AZ-amino acid she decided to give it a try.

It took a couple weeks for her to notice but **once it started working she was thrilled.**

As she puts it...

"The AZ-amino works for memory! It makes you feel like you're picking up information in a file cabinet you haven't used in a very long time."

And then there's Pam Miller...

Pam was only 57 when her husband was diagnosed with Alzheimer's.

They were both **devastated** and she was heartbroken watching her husband's decline...

But then she was lucky enough to hear about the AZ-amino acid...

And she decided to add this unique amino acid into her husband's daily diet.

And his condition has remained stable ever since!

Pam says...

**Models for illustrative purposes*

“It was mind-blowing for me. It’s a rare opportunity when someone can treat a disease.”

And finally, there’s Jim Talbot.

Jim had struggled with memory problems for years...

He’ll even be donating his brain to science to help with research on neurological disease.

He tried the AZ-amino acid after reading about a study online and as he puts it...

“The AZ-amino acid is great for memory recovery. It has helped my memory issues substantially.”

Of course, these are anecdotal reports and only a few examples while studies are ongoing...

But for anyone looking for a quick and natural way to prevent and treat Alzheimer’s, ***this couldn’t be easier.***

But don’t expect mainstream doctors to start prescribing the AZ-amino acid for ***decades...***

The FDA has approved a number of trial studies for this promising new treatment, but the results could take years.

And the old medical guard won’t be convinced until all the I’s are dotted and T’s crossed.

But that isn’t stopping the Harvard-trained researchers who are already studying this...

In fact, they’re ***so confident...***

They’ve been stirring the AZ-amino acid into their coffee every morning.

And why wouldn’t they? One of the head reseachers is even on record saying he believes it can delay the onset of Alzheimer’s until the age of 120!

And that’s why I’m releasing full details on this exciting new treatment in my new book, ***The Circle of Life***, which you can get as a free bonus today through this special offer.

Inside you’ll find everything you need to know about the AZ-amino acid.

But Alzheimer’s and any disease for that matter, can be complicated.

I believe patients should discover a ***wide range*** of options when it comes to treating their condition.

Which is why on top of the AZ-amino acid we’ve just discussed, inside this exclusive 576-page book, you’ll find ***14 more chapters*** on how to fight Alzheimer’s!

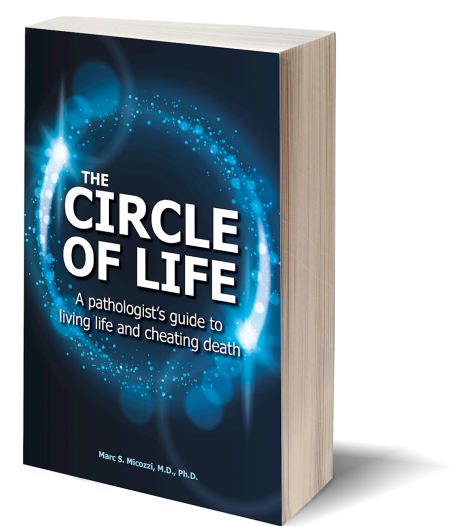

I’ll tell you how you can claim this exclusive book ***FREE*** through a special offer in just a moment...

But first, let’s talk about a different way to look at one of the most prevalent diseases today, ***diabetes.***

With over 400 million cases of diabetes around the world and rates expected to skyrocket in the coming years...

Diabetes is one of the ***most urgent health crises on the planet.***

And just like cancer and Alzheimer’s, I believe you can learn a lot about how to beat this disease by focusing on how it ***ends.***

And here's a secret you might not have known...

There's a stealth killer lurking behind diabetes... and it's *not* sugar!

Think about it... you rarely here of someone dying of diabetes.

You're much more likely to hear someone died of, "***complications from diabetes.***"

And these complications often ***aren't*** caused by excess sugar in the blood stream.

In fact, as a pathologist I examined ***countless*** bodies of diabetics whose blood sugar was perfectly under control, but their disease had still progressed and their organs had failed.

They'd die of things like heart disease, liver disease and kidney disease.

And one of the main drivers behind all of these conditions... ***inflammation.***

Along with high blood sugar, recent studies have found that diabetics also have high levels of inflammation.

As type 2 diabetes starts to progress, the inflammation causes the body to become less sensitive to insulin...

This insulin resistance also leads to higher inflammation.

Eventually, a vicious cycle takes hold of high blood sugar increasing inflammation and vice versa.

So in order to beat diabetes, you need to treat both blood sugar *and* inflammation.

And right now, most drugs out there are only focusing on blood sugar... while completely ignoring diabetes' stealth killer, inflammation.

But studies have been cropping up showing a natural breakthrough can ***finally do both!***

In fact,

"This one natural treatment completely changed my mind about diabetes."

I've always championed a natural approach to medicine rather than the mainstream philosophy of throwing more and more drugs at every problem...

But there was one exception for me... and that was diabetes.

For decades I simply never found a natural diabetes treatment strong enough to meet my standards.

And so my go-to recommendation was always metformin... until now.

I've finally found a natural solution that ***blows metformin out of the water.***

I call it PK-plus.

And it works in a similar fashion as metformin, by boosting a protein in the body known as AMPK.

This protein works to transport excess sugar out of the bloodstream and into the blood cells to burn as fuel.

And when it comes to activating AMPK...

**A recent study showed that PK-Plus
is up to 400 times stronger
than Metformin.**

Hence the name!

And this enhanced power to control blood sugar has led to some ***amazing*** results.

In one study, researchers looked at 240 patients with metabolic syndrome...

Patients that were right on the borderline of becoming diabetic.

They gave 120 of them PK-Plus and the other half a placebo.

And after 9 months the results were hard to ignore...

100% of the patients treated with PK-Plus completely avoided diabetes

But aside from being a powerhouse when it comes to lowering blood sugar...

PK-Plus is also one of the strongest natural anti-inflammatory agents on the planet...

Even stronger than one of the ***most popular*** pharmaceutical drugs!

In fact, when comparing two separate studies involving thousands of patients...

PK-Plus slashes inflammation levels more than twice as much as Metformin

And it's this second aspect that really convinced me.

Finally, a natural agent that can lower blood sugar while at the same time keeping deadly inflammation in line.

It's why a scientific review of over 200 in-vitro, animal and human studies on PK-Plus found that it can help with deadly and debilitating complications like...

Kidney disease, vascular disease, neuropathy, retinopathy and many more.

These are the same complications that eventually wind up on the death certificates of countless diabetics.

PK-Plus is truly a ***life-saving breakthrough***.

I can't help but think of all the autopsies that could have been avoided decades ago if more had been known about it at the time.

But despite the ***eye-opening*** results...

Most mainstream doctors are still more likely to prescribe diabetics a drug that only targets blood sugar... which as we've seen is ***only half the problem***.

That's why I'm getting the word out today by giving away free bonus copies of my new book, ***The Circle of Life: A pathologist's guide to living life and cheating death***.

In this exclusive bonus gift to you, I'll reveal everything you need to know about PK-Plus and why I think it should be the first line of defense when it comes to diabetes.

And in just a minute, I'm going to tell you how you can obtain this 576-page masterpiece, as a free bonus.

But before I do, let me quickly talk about a somewhat controversial topic you'll find inside.

Depression.

It's a condition that's been ***skyrocketing*** in the US.

And doctors and psychiatrists are handing out antidepressants like candy to treat this unfortunate condition.

Right now, tens-of-millions of Americans are on antidepressants.

Harvard University reports the number of Americans on antidepressants increased 400% between 1988 and 2008...

and another 60% since then.

And as a consulting forensic pathologist and expert witness in the early 2000's, ***I had a front row seat*** as this dangerous trend began to take hold.

Time and again, I saw cases of depressed patients who had harbored suicidal thoughts for years.

But somehow, they were making it along. Then, they started to take a popular antidepressant known as an SSRI. ***And, suddenly, they committed suicide.***

The theory is that while depression saps a person's motivation to do anything...

These dangerous drugs boost serotonin just enough to where the depressed patients don't feel any better...

But they suddenly have the energy to carry out their suicidal thoughts.

And it wasn't just me noticing this.

Studies have since born this out, especially in children and young adults.

In fact, the FDA finally placed its ***highest warning***, a black box label, on these dangerous drugs after reviewing the research.

On top of this dangerous risk...

Antidepressants can also be addictive and lead to other fatal side effects such as...

- **Liver damage**
- **Bleeding in the skull**
- **Breast cancer**
- **Heart rhythm abnormalities**
- **And more...**

Even worse, a *British Medical Journal* review found that only about 1 in 7 people actually benefit from antidepressants!

That's is why I always prefer a natural approach to depression before resorting to dangerous drugs.

And inside my new book, ***The Circle of Life***...

You'll find a simple treatment anyone can do while sitting at the breakfast table that's helped 40% of patients put their depression in remission in just 8 weeks.

And on top of this, ***The Circle of Life*** also includes my "Drug Free Guide to Defeating Depression" chapter inside.

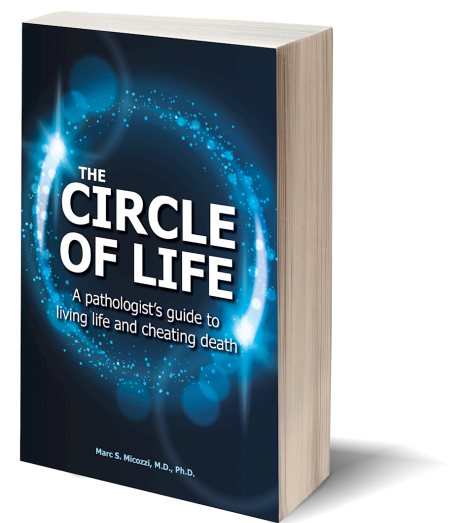

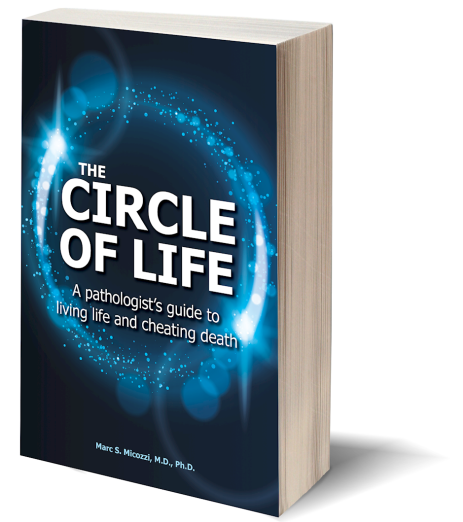

This comprehensive guide gives you even more detailed information on antidepressants to avoid and natural ways to conquer this serious condition.

You can get it today as a free bonus gift, and I'm about to tell you exactly how.

But before I do, I'd be remiss if I didn't spend a moment on ***America's No. 1 killer... heart disease.***

For as long as I can remember, mainstream medicine has been beating the cholesterol drum when it comes to avoiding heart attack and stroke.

But in autopsy after autopsy, that's not what I was seeing.

In fact, many heart attack and stroke victims I examined didn't seem to have elevated cholesterol at all.

And Harvard has since confirmed this...

In a study of 1.7 million heart attacks and strokes, they found over 50% occurred in perfectly healthy people. As they put it...

“More than half of all heart attacks and stroke occur among apparently healthy men and women with average or low levels of cholesterol”

-Paul M. Ridker, MD, MPH
Harvard Medical School, Boston, Mass

So what's going on with the other 50%?

While things like CRP (C-reactive protein) and triglycerides are important to keep an eye on...

I've found one other culprit that virtually gets no attention.

And ignoring it can be a **deadly gamble**.

Even researchers from the mainstream medicine World Health Organization have admitted that testing for this hidden blood marker may be “... **more important** than cholesterol and lipoproteins.”

One study has even found that in men with either high cholesterol or high blood pressure...

Elevated levels of this stealth heart marker can skyrocket risk of heart attack up to 12 times.

It's a protein in the blood responsible for clotting, which is usually a good thing...

The body needs it to repair tiny cracks and crevasses in blood vessels and arteries.

But here's the problem...

In high levels, this protein can stop up arteries like a clogged kitchen sink.

Even scarier, mainstream medicine **currently has zero direct treatments** that can stop it.

Which is why many doctors don't even bother to test for it.

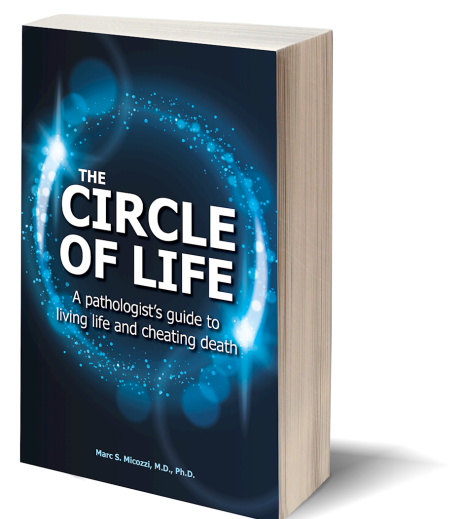

So millions of Americans could have deadly levels of this scary protein and not even know it.

But luckily, inside your free bonus copy of my exclusive report—***The Circle of Life***—you'll find out everything there is to know about keeping it in line, naturally.

Including what it is, how to test for it, and a natural treatment that reduced levels of this deadly protein twice as much as those who did nothing in one study.

In addition, you'll also find **17 more chapters** on how to side-step heart attacks and strokes, keep arteries clear and blood pressure perfect.

At 576 pages, ***The Circle of Life***, is one of the biggest free gifts we've ever offered. Inside you'll find full details on...

- The south pacific secret shown to cut lung cancer risk by 99% in animal studies.
- The “HALLELUJAH!” treatment that ended my 10-year battle with knee pain
- An Alzheimer’s plan that scored a 90% success rate in one shocking study
- The simple vitamin that studies show cuts stroke risk by 27%
- A 6-chapter plan for defeating diabetes, pre-diabetes and metabolic syndrome
- A natural breakthrough that studies show adds years to lifespan in just 6 weeks
- How to cut depression up to 60% with one change
- The wonder supplement that slashed COPD symptoms by 40% in one study
- How to defend the body against superbugs in 5 easy steps
- The natural plant resin that destroys chemo resistant cancer cells
- And so much more...

And remember, your free copy of The ***Circle of Life*** is also packed with everything we talked about today including...

- The Anti-A cancer treatment that studies show boosts cancer survival up to 7X in even the most hopeless of cases
- The AZ-Amino acid that researchers believe can delay Alzheimer’s symptoms until the age of 120
- The diabetes dynamo, PK-Plus, that slashes diabetes and deadly inflammation
- The new, all-natural depression treatment that cuts symptoms by 40% in just weeks according to studies
- The stealth heart disease marker that could be behind 50% of all heart attacks & stroke and how to stop it

So, are you ready to claim your own FREE bonus copy of ***The Circle Of Life: A pathologist’s guide to living life and cheating death?***

Then let me explain how you can get it for free.

Everything you’ll find in this complementary book...

Was first made available to a ***very exclusive group***.

A collection of “insiders” who get ***up-to-the-minute access to my latest research***, writings and presentations.

And they’re able to use this exclusive access to live lives most over the age of 60 can only dream about.

They’re full of energy, vim and vigor.

They’re outgoing, try new hobbies, and socialize with friends and family.

They’re primed to ***live longer, healthier and happier lives.***

All while getting on-demand information to help them beat the odds on pain, cancer, Alzheimer’s, diabetes and so much more.

It’s all thanks to the age-defying breakthroughs I publish every month in a unique health newsletter I call... ***Insiders’ Cures.***

Throughout the year I ***consult with experts...***

Research the latest natural health breakthroughs...

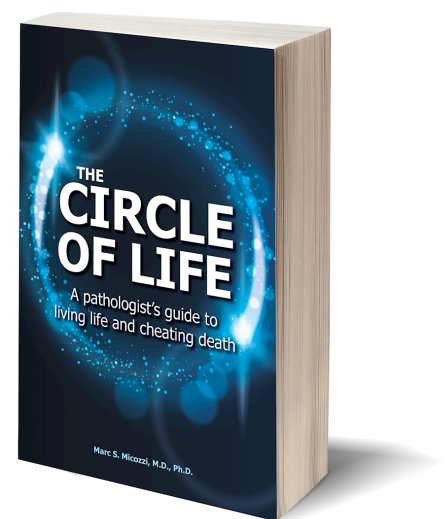

Analyze study-after-study looking for the ***cream of the medicinal crop.***

And *Insiders’ Cures* is my No. 1 outlet for sharing all this information virtually as it’s discovered.

It’s through this publication that my exclusive readers learn about the ***newest and greatest natural treatments*** for things like...

Fighting cancer... no matter the stage.

Getting ahead of blood sugar... whether it’s metabolic syndrome or full-blown diabetes.

Fighting Alzheimer's... Regardless of how far its progressed.

Soothing pain... From everyday aches to debilitating arthritis.

And so much more.

Information on **natural and innovative** ways to treat these conditions is being pioneered as we speak...

And as we've seen today, they're typically discovered by looking beyond the tunnel vision of mainstream medicine...

And approaching diseases from **a completely different perspective**.

That's exactly what I do every single day...

And *Insiders' Cures* is how I share these **life-saving discoveries** with the world.

And today I'd like to extend a **personal invitation** to you to join my private **Insiders' Cures** readers group...

As an exclusive member you'll receive "Insider Status" which means you'll receive...

- ✓ Free daily updates through my *Daily Dispatch* emails
- ✓ Exclusive access to my online archives
- ✓ Insider "first looks" at my latest supplements and learning protocols
- ✓ Members-only discounts on my exclusive line of supplements and learning protocols
- ✓ My monthly *Insiders' Cures* updates on my latest and most important research

And you can start receiving this **exclusive, life-changing information** for yourself.

If you accept my invitation...

I'll make sure you start receiving each and every monthly edition of this behind-the-scenes, insider report.

...filled with information on my **latest discoveries** for fighting cancer, memory loss, diabetes, heart disease, vision loss and so much more...

And, as a sincere **thank you** for giving *Insiders' Cures* a try...

You'll get my brand new, 576-page book, ***The Circle Of Life: A pathologist's guide to living life and cheating death...***

Absolutely FREE.

Here's how it works.

To cover the costs of publication, as well as my ongoing research...

There is a very small fee to subscribe to my *Insiders' Cures* newsletter.

It's likely less than you spend on coffee in a month.

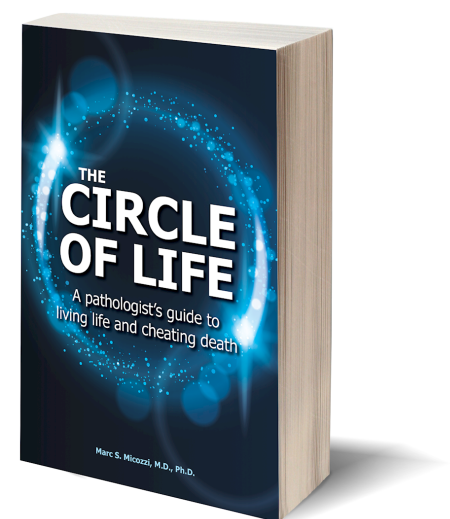

And if you're unhappy with *Insiders' Cures*, for any reason at all, at any time at all... simply let us know and you'll receive a full refund for the remaining issues.

Even better, you can still keep the 576-page **Circle Of Life** book as my gift to you... even if you cancel!

That's how confident I am that **you'll be completely satisfied** with the life-changing information you'll receive on topics as wide and varied as...

Surviving cancer... treating hearing loss... restoring poor vision... fighting Alzheimer's... soothing Arthritis... and so much more.

Again, my exclusive group of monthly subscribers is enjoying their access as we speak.

But if you don't think it's the best decision you've ever made for your health, then simply give us a call to receive your refund... no questions asked!

And yes, the free gifts are yours either way!

Are you ready to get started?

Then simply press the button below this presentation...

When you do, you'll be taken to a **secure page** so you can fill in the address where we should mail your free 576-page copy of...

The Circle Of Life: A pathologist's guide to living life and cheating death...

But before you do that, I have one final thing for you today...

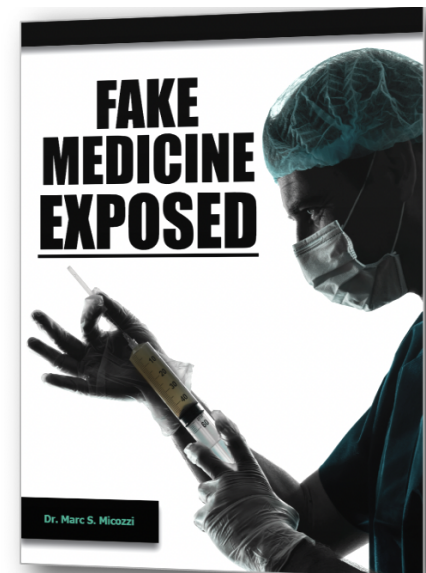

When you RSVP in the next 19 minutes, I'll send you another **FREE GIFT**... A bonus report called ***Fake Medicine EXPOSED***...

...and it contains the secrets, scare tactics, and outright LIES Big Food, Big Pharma and Big Medicine use to take advantage of you and your money.

The information you'll find in this "survival guide" will help **keep hard-earned money in your pocket** (and out of theirs).

Because you'll find insider information **no one else is talking about**, like...

- ✓ **The 3 lab tests you should NEVER get.**
- ✓ **10 medical exams you may not need, and some that may actually do more harm than good.**
- ✓ **The 1 common painkiller you should avoid at all costs.**
- ✓ **The 3 "golden" vaccines most of us just don't need!**

Plus, you'll also find over a dozen more practical tips and tricks in ***Fake Medicine EXPOSED*** that...

I guarantee will save you loads of money over your lifetime...

Which makes the modest subscription fee more than worth it!

And, when you agree to become part of my ***Insiders' Cures*** exclusive subscriber circle today...

I'll send you the free ***Fake Medicine EXPOSED*** bonus report along with...

The Circle Of Life: A pathologist's guide to living life and cheating death...

Absolutely FREE!

Simply click below to subscribe now and we'll send both of these exclusive gifts to you.

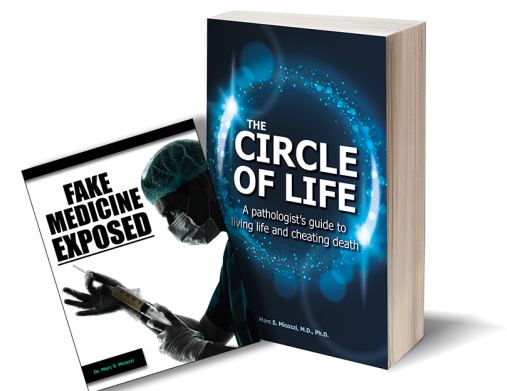

Just tell us where you'd like them sent!

And in the meantime, you'll gain online access right away.

We'll send you a confirmation email when you've completed your subscription... just click on the private, secure link inside to access all your gifts.

You can instantly open your free ***Circle Of Life*** book to read more about everything we've talked about in detail today including...

- **The Anti-A cancer treatment that studies show boosts cancer survival up to 7X in even the most hopeless of cases**
- **The AZ-Amino acid that researchers believe can delay Alzheimer's symptoms until the age of 120**
- **The diabetes dynamo, PK-Plus, that slashes diabetes and deadly inflammation**

- **The new, all-natural depression treatment that cuts symptoms by 40% in just weeks according to studies**
- **The stealth heart disease marker that could be behind 50% of all heart attacks & stroke and how to stop it**

You can also flip through the 576 pages and find even more information on fighting cancer, Alzheimer's, arthritis, diabetes, obesity and so much more!

Then, when you have a minute, open your free BONUS report: ***Fake Medicine Exposed...***

And learn how to avoid the **scams and unnecessary treatments** that are costing you hundreds *and even thousands of your hard-earned dollars...*

But, remember, there is no risk to you today.

Your complete satisfaction is **always 100% guaranteed**.

You can cancel anytime and keep all three gifts ***no matter what!***

Simply click below to start your new life-changing journey.

Discover a life free from fear of cancer, Alzheimer's, diabetes, heart disease and so much more.

It's been a pleasure speaking with you today.

For ***Insiders' Cures***, I'm Dr. Marc Micozzi. Thank you for spending this time with me today.
